

**TO THE SCIENTIFIC FOUNDATIONS AND PHILANTHROPIC ORGANIZATIONS**  
**Support the Project of the Century**

Ladies and Gentlemen:

I apply to you tentatively for a financial support of my scientific project the implementation of which is of vital importance for civilization. The project is extraordinary and overwhelming and therefore hardly fits in any of your current donation programs; so it is up to you to decide whether you could nevertheless support the project and how, if necessary, I should modify the application.

I am an independent researcher, PhD, an Israeli citizen, an immigrant from Russia, currently a pensioner, 77. The project is based on my life-long research in exact sciences and humanities and provides for the establishing, either in Europe or the USA, of **AN INTERNATIONAL SCIENTIFIC CENTER** aimed at reforming modern science and education. Such a reform is now absolutely necessary because, as an analysis shows, the crisis of modern science is underlying the present general, ideological in its nature, crisis of civilization, threatening its very destiny and now approaching its crucial stage.

Despite very specific conditions in the present Zionist Israel, having lived therefore for several years in Europe and Canada, I have managed to make a significant progress in starting the reform of modern science, as follows:

(1) I have initiated the reform of modern physics and published the research in hard copies and online; the result challenging modern theories and programs and, for that reason perhaps, not yet officially recognized;

(2) I have developed the methodology for the reform science and launched a website, *The Reform Science Center* ([www.reformscience.org](http://www.reformscience.org)), to guide and coordinate the reform worldwide;

(3) with that methodology, I have recently created the frameworks for the sciences of politics and economics, which is perhaps socially most important (see Enclosure).

The above achievements seem to signify a turning point in the history of science, thus heralding changes in society as well. To proceed with the reform, I need now an NGO, possibly in Europe or the USA, with a staff of 5 to 10 persons, as the first stage of the above Center. My first task would be to put the reform of science on track and prepare younger researchers to substitute me when necessary. At present I cannot achieve that on my own while living in a hostel controlled thoroughly by Russian agents, without reliable Internet and postal services, with my correspondence supervised and filtered. So I desperately need now social and financial support. To start the project, I need a donation from \$1 million to possibly \$10 million.

In this connection, choosing most lofty priorities, could you please consider an opportunity to provide my Project of the Century with your sponsorship. Your possible donation would certainly be recognized and published on my website.

Sincerely,

Igor Makarov, PhD, Independent Researcher  
Reform Science Center, P.O. Box 461, Haifa 31003, Israel
