

[Reverd free spam call detector app for iPhone](#)

AUTOMATIC

You do not need to manually mute each and every unwanted number that calls you.

COMMUNITY SUPPORTED

Constantly updated [community reported](#) list of harassing phone numbers.

WORKING SEAMLESSLY IN THE BACKGROUND

Get it and forget it kind of app.

Our engineers created a remarkable unique application to control unwanted phone calls as the users requested. We developed a new process to make it possible on iPhone (Patent pending).

This is the App you need to stop unwanted calls efficiently and effortlessly with minimal user input. Reduce stress. Eliminate disturbances, annoyance, irritation, anger and frustration. Frequent updates with new harassing phone numbers from the community reported complaints are provided for better protection.

None of the existing prior applications provide that level of comfort and automation.

The [Reverd app](#) is elegant, intelligent, well thought and well performing app with minimal user input:

Ad-free

User friendly

Lightweight application

Multilingual (7 languages)

Easy on resources and battery

[Easy setup with minimal user input](#)

Working seamlessly in the background

Easy to use:

No activation needed

No location needed

No root access needed

Does not affect your privacy

Does not mess with your contacts

Features include:

Automatically check incoming calls against user's personal list

Automatic updates of community reported phone numbers (for subscribers)

Manually add a phone number to your own unwanted list

[Report phone numbers](#) to the community to protect other members

Move phone numbers between your lists at your discretion

Available on [iTunes App store](#)
