Dr. Christophe Rossel
EPS President
EPS Office
Strasbourg, France

Dear Dr. Rossel,

RE: theoretical physics conference

The crisis of modern physics, the theoretical physics first of all, is currently one of the most important sources of the present general ideological crisis of civilization now threatening the very existence of humankind. My research, "A THEORY OF ETHER, PARTICLES AND ATOMS", now published online and in hard copies (www.amazon.com), but not yet recognized officially, initiates the reform of modern physics and paves the way to the reform of modern science in general and, therefore, to resolving the above crisis of civilization. Thus the delay of the official recognition of my research now happens to threaten the destiny of civilization, exposing the EPS as perhaps the main culprit.

In this connection, taking into account that I am an independent researcher having absolutely no connection with scientific institutions in Israel, while my numerous attempts to get support from scientific institutions and conferences in Europe have been unsuccessful so far, would you please take urgent measures to convene an EPS Conference on Theoretical Physics inviting me to make a report on my research, titled possibly "New Methods in Theoretical Physics", possibly within the frame of one hour for the report plus 15-30 minutes for discussion. Some relevant online documents are enclosed.

Yours sincerely,
Igor Makarov, PhD
Independent Researcher, my EPS membership ID: im110290
