

Mr. Jean-Claude Juncker
President
European Commission
Brussels

23.11.2019

Dear Mr. Juncker,

RE: Millennium event in science and politics

I am an independent researcher, PhD, an Israeli citizen, 84. In the course of my almost 40-year-long research in exact sciences and humanities, I have achieved the following:

- (1) reformed modern Theoretical Physics;
- (2) found the true interpretation of the General System Theory;
- (3) created the frameworks of the true sciences of Politics and Economics;

In my opinion, these results, not officially recognized yet, amount to a turning point in the history of science and civilization.

The above results have encouraged and enabled me to start settling the present general ideological crisis now threatening the very existence of humankind. Seeking support for my mission, I have repeatedly appealed to UNESCO, scientific and social organizations in Europe and Israel, but in vain. Recently I applied to the Cavendish Laboratory of the Cambridge University concerning the professional estimation of my research in physics - only to be informed that my request was irrelevant for I was not a graduate student of the University. In my view, the main reasons for all my attempts to find a helping hand for my mission were my status of independent researcher, obscurantism of European institutions and the interference of Russian agents waging an omnipresent secret war against me.

Thus at present there are only two ways for Europe and civilization:

- (1) to proceed with the cold war until it turns into a hot war, most likely a world nuclear one; or
- (2) to start reforming the ideology of modern society making use of the above scientific breakthrough and my experience in reforming modern science, political science, in particular.

In this connection would you please consider the above options; if the second one looks more preferable, I am ready to present my respective project and discuss its details. To contact me, it would be perhaps necessary to use a governmental assistance, because my communications are usually blocked for messages from promising correspondents - in this antifascist democratic state of Israel. For more information, please, see Enclosure.

Yours sincerely,

Igor Makarov, ID310295142. Independent Researcher, PhD

P.O. Box 461, 31003 Haifa, Israel.
