4. Transportation Improvements
 - a. Roads
 - b. Intersections
 - c. Corridors
 - d. Non-Motorized Transportation
 - e. Mobility/Mass Transit
5. Adjourn

Bill Lozier, Licking County Transportation Improvement Director, was in attendance to review the role of the TID, explain what TID projects are underway in the Township and explain the work to improve roads to/from Intel and surround development.

The committee asked questions about the proposed Refugee Road Improvement project and Pike Street Improvement Project. Concerns about the length of the Refugee Road project were discussed including the terminus of the project (Columbia Road instead of SR 310). Pike Road concerns included the connection to US40 and the proposed project that will also connect at east end of Pike Street.

Jim will get the Refugee Road plans from Bill Lozier and send to the group.

Mink Street has a speeding problem.

SR310 at US40 needs another dedicated left turn lane.

Another I70 interchange is needed.

At the October meeting, the committee will see a draft map of proposed improvements to intersections and roadway segments to comment as well as propose their own needs and wants.

A draft community survey will be sent prior to the next meeting.

The next meeting is October 12, 2022 at 6:00pm.

Respectfully Submitted,

Jim Lenner

Etna Township Comprehensive Plan Community Survey

On Month Day, 2022, the Etna Township Trustees appointed fifteen (15) community residents to the Community Advisory Committee.

The Etna Township Comprehensive Plan Community Advisory Committee meets on the 2nd Wednesday of each month beginning at 6:00pm. The public is encouraged to attend. The meeting is held at the Etna Township building, 51 Liberty Street.

Together with Neighborhood Strategies (our planning consultant), the Community Advisory Committee has drafted the following public survey. Survey questions were designed to help the committee gather information about public sentiment on a variety of issues affecting the future of the Etna Township. Questions asked for basic demographic information, as well as opinions regarding current and future services, and development within the community. One of the most important considerations when formulating a comprehensive plan is public input.

Results of the survey will be posted to the Etna Township website.

What is a comprehensive plan?

A comprehensive plan is a plan for a community's future that attempts to consider all local and regional factors. It evaluates the state of the community by taking inventory of current demographics, infrastructure, services, and physical characteristics, as well as by assessing the needs and concerns of its residents. The plan then incorporates this information into a series of explicitly stated goals, objectives, and recommendations. Ideally a comprehensive plan is updated every five years.

Many of the recommendations within the comprehensive plan are visualized through the future land use map, a document that indicates where particular types of land uses have been recommended within the community. It should be emphasized that the Future Land Use Map is not a zoning map; rather, it is a collection of recommendations. An area on the future land use map that has been recommended for industrial use, for example, has not been rezoned and will not necessarily host an industrial use in the future. The future land use map and the comprehensive plan are guides that should be considered and observed by local officials when making decisions concerning the community.
