Modelorg Antibody

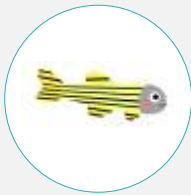

Creative Biolabs specializes in producing antibodies for use in model biological antibodies and customized services. We also focus on the demand for multispecies antibodies to assist in deep genomic sequencing and proteomics research. Please do not hesitate to contact us with any questions.

<https://modelorg-ab.creative-biolabs.com>

Creative Biolabs is committed to the research on various model organisms (such as Arabidopsis, Rice, zebrafish, and silkworm). We have extensive experience in building your high-throughput and high-efficiency species antibody functional research platform and creating an indispensable resource center.

- Assist life science researchers around the world with comprehensive, convenient, and professional model organism service.
- Convenient and efficient.
- Provide the omni-directional modelorg antibody services.
- Professional technical team.
- Focus on the biology of model organism antibodies.

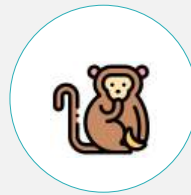

Creative Biolabs is glad to offer different model animal antibodies. A list of our most popular antibodies are shown below.

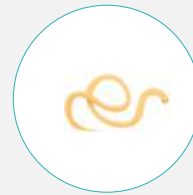

Zebrafish

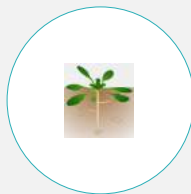

D. melanogaster

Rhesus

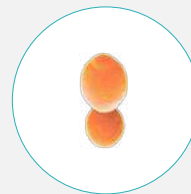

C. elegans

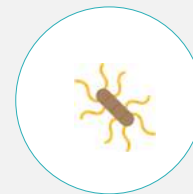

Arabidopsis

Rice

Yeast

High-quality & Full-scale Recombinant Antibodies Related Products for Your Research

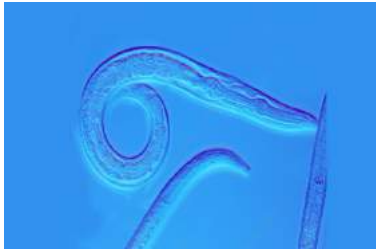

Creative Biolabs is a leading antibody service provider with extensive experience in a variety of antibody production and engineering fields. We offer high-quality and ready-to-use antibodies, as well as flexible and comprehensive customized services for the antibody production.

Arabidopsis

Creative Biolabs is one of the first companies developed Arabidopsis antibodies for various proteins. We have a full list of Arabidopsis products and we promise to provide the most comprehensive Arabidopsis products for plant genetics, physiology, and biochemistry researches.
