

6 recent examples of the Vital Blood Scan microscope photo's

Heavy metals, body 'foreign' substances, parasites & fungi

Introduction and background:

Since March 2020, we have been seeing the most 'strange things' in the [Vital Blood Scan](#) from the young, to the elderly among us, vaccinated or not, we are seeing kind of similar 'strange substances' that we have never come across the 30 years before. The vitality complaints people have are also new combination of those that can be called 'unusual'.

We hear more and more people complaining of; lack of energy, poor concentration, easily distracted, forgetful, dizziness, headaches, quick fatigue, lethargy, depression, anxiety and mood swings, coordination problems, muscle and joint complaints, heart palpitations and a 'disturbed'/bad sleep.

This development of new combination of vitality complaints has caused quite a bit of uncertainty when it comes to our vitality. This is compounded by unclear and often contradictory information coming from reputable professionals, such as doctors, specialists and even professors. A worrying development is that open dialogue between professionals is discouraged and or completely obstructed.

This complicates the understanding of what is really '*the root cause of the emerging combination of vitality complaints*', in order to then arrive at 'working solutions' to regain our vitality.

When the need is highest, salvation is at hand:

In the Forever Vital Support Team, too, we were hit by serious vitality complaints.

This allowed us to discover quite quickly that especially what was still giving good results before 2020, now turned out not to work at all, or insufficiently. Recovery was also extremely slow. The complaints were of such a nature that they were even life-threatening. The need was high to quickly arrive at vitality-balancing solutions that worked effectively. The best-working plan of action proved to be a combination of;

- constructive step-by-step controlled plan through regular tests (Holistic Vital Blood Check Scans), by detoxifying the accumulated toxins that burden our bodies, both physically and mentally
- increasing energy levels by supplementing deficiencies and supplying the DNA codes and necessary building blocks and thus upgrading overall vitality.
- This plan is carefully supported remotely 24/7 by 'sending' specifically selected frequencies; the [Bio-Atunement](#), for the better vitality results in both the short and long term.

Do 'heavy metals' impact our vitality?

The toxicity of heavy metals (Number 1 & 2) no longer needs to be demonstrated. Of mercury, for example, this has been known since ancient times. Heavy metals are generally carcinogenic. When heavy metals accumulate in food chains (algae, fish, mammals, etc.), the initial low toxicity increases rapidly per successive link. And so here is today's problem. By now applying for several decades the so-called 'legally' permitted doses in our food, drinking water, geo-engineering (air), as well as in certain medicines and vaccinations, a certain heavy metal load can be seen today in young and old in the Vital Blood Scan. **Not only in the blood but nowadays also in the head** (number 3 & 5). The latter has serious vitality implications for our thinking ability and nervous system functioning, which we see reflected in the huge increase in dementia, Parkinson's & Alzheimer's. But it does not stop with the burden of 'metals', we increasingly see in both young and old the presence of 'body foreign substances' often accompanied by parasites(number 6) and fungi.

What are 'body foreign substances'?

All substances that are **NOT organic** (Number 4 & 5) are 'foreign' to our body. The problem with all body foreign substances is that they can NOT be absorbed and or processed by our biological and organic body. This means that all these substances are basically **'toxins'** to our body. Since 1880 to today, the earth and mankind has been facing an explosion of body 'foreign' substances in our environment, so that's **over 140 years!**

Body foreign substances for the body are: all products made from petrol, including cosmetics, certain medicines & vaccinations, cleaning agents & body care, fertiliser(s), pest control agents, heavy metals, plastics, nano-bots/worms and all other synthetic substances made in laboratories to replace mostly a natural variant (e.g. herbs from nature).

What are the main contributors to body 'foreign' substances?

The main contributors to a global increase in body foreign substances include; the use of 'synthetic' drugs and supplements, the intensification of vaccination programmes and the so-called convenience of ready-to-eat 'fast' food with too much of 'wrong sugars & fats' and the increase in all kinds of soft drinks with chemical preservatives that affect the functioning of our 'intestinal system'. The result is an accumulation of 'pollution' over many years in our body. The [Vital Blood Scan](#) shows more and more that this pollution leads to cell damage, disruption in hormone metabolism, lung damage, blood circulation problems and huge increases in autoimmune diseases (In the USA alone, 54% of young people have this) and there is an explosion of cancer.

All this is apart from the damage caused by man-made radiation (EMF, Electro Magnetic Field radiation caused by wireless technology such as WiFi, mobile phone and so on) that has increased exponentially, especially in recent years. This man-made radiation is there 24/7 and causes continuous body and mental stress that everyone 'suffers' from, but especially our children and Mother Nature.

Perhaps you are also looking for solutions that have been proven to work?

Given the rapidly changing state of our vitality today, we as a Support Team were increasingly getting people's demand for 'natural working vitality enhancing solutions'. This need has led to a turbo development of the Forever Vitals; unique liquid vitality supplement solutions. As a result, you can now choose from 1 of the [6 theme packages](#) for yourself and/or your loved ones. On the [website](#) you will find information with each package about: a. for whom, b. the result and c. an intake schedule and at the end of the 6 packages an [energy exchange overview](#), to be used as a 'dashboard'.

Specific supplements for the removal of heavy metals and body foreign substances are: [MVA Forte](#) and for the finer 'toxins' in the smallest capillaries [Hermystica](#) (think head, eyes, lungs e/o kidneys) supported by the 'remote' frequency offering: [Heavy metals, body foreign substances &...](#) Included in this offer is a test-scan 'Read Only' ([1 drop of blood](#) on a microscope slide) to map your 'load'. For an overview Bio-Atunement options click [here](#).

Want to go for a more personalised vitality approach?

Then consider starting the [Vital Blood Scan](#). This holistic Scan of the body & mind reveals, where the toxins sit specifically with you, the extent to which you are burdened with heavy metals, body foreign substances and or parasites & fungi, which impact your vitality. Of course, this varies greatly from person to person. The Vital Blood Scan can reveal any other imbalance that needs to be addressed first to make the body strong in the better way to handle the removal of the 'toxins'.
