

'Flying Disc' Found; Army Holds Missile

'Shoot First' Police Told in Manhunt Here

Honolulu police have been ordered to "shoot first and ask questions afterwards" as they intensified their search for the robber who, reportedly, shot and killed a taxi driver, early this morning.

Detective Lt. Roland D. Sagun said his men have been ordered to exercise extreme caution in picking up any suspect in the case. Investigation is conducted by Detective Leo Kater.

Queen's hospital officials said this morning Mr. Ahrens is recovering satisfactorily from a fractured skull and a .38 caliber bullet wound in his neck.

Mr. Ahrens was hit over the head and shot on McCandless lane by a cab passenger who robbed him of \$100 and fled in his car.

Feinsinger Meets With Pineapple Disputants

Nathan P. Feinsinger, the U. S. labor department's trouble-shooter, moved rapidly into the critical pineapple labor dispute today.

Arriving Monday night, the special representative of Secretary of Labor Lewis B. Schwellenbach scheduled two conferences today.

From 9 a. m. to 10 a. m., Mr. Feinsinger met with the industry negotiating committee at the Hawaii Employers Council. After lunch, he was to confer with I.W.O. leaders, starting at 1.

He heard the industry outline its position in the meeting this morning. Afterwards he said he did not expect to hold a joint conference today but added, however, such a conference is "conceivable."

He termed these talks "exploratory."

Final settlement of the pineapple dispute will prove a "natural result" of the recent peaceful settlement of the west coast maritime dispute, Mr. Feinsinger said Monday night.

Mr. Feinsinger arrived at Honolulu airport as an emissary of three federal government departments seeking to prevent a strike in the local Hawaii industry.

The labor department counselor said that issue at stake in the mainland maritime dispute was less serious than those now involved in the local pineapple dispute.

Opposing maritime factions, he said, were "farther apart" even than are the multi-million dollar pineapple growers and the I.W.O. in their present negotiations.

"Outcome of this case will have a strong effect on future developments in both longshore and negotiators within the territory," Mr. Feinsinger said.

Particular that he knows "not a

Object Is Removed For Study

New Mexico Rancher Is Credited With Discovery

WASHINGTON, July 8 (P)—Wiz. Gen. Roger Ramo said today that a flying saucer, which previously had been described as a flying disc found near Roswell, N. M., is being shipped by air to the Army Research Center at Wright field, O.

ROSWELL, N. M., July 8 (P)—A "flying saucer" has been found on a nearby ranch and turned over to the army, it was disclosed here today.

Lt. Warren Haight, public information officer of the Roswell army air field, announced the find was made "sometime last week," and had been turned over to the air field through cooperation of the sheriff's office.

It was suspected at the Roswell army air field and subsequently located by Maj. Jesse A. Marvel, of the 50th bomb group intelligence office at Roswell, "in higher headquarters."

"Other reports said the disc was flown in a Superfortress to an undisclosed destination."

The flying object landed on a ranch near Roswell sometime last week. Not having phone facilities the rancher stored the disc until such time as he was able to contact the sheriff's office, who in turn notified Maj. Jesse A. Marvel, of the 50th bomb group intelligence office.

Lt. Haight reported. Action was taken immediately and the disc was picked up at the rancher's home. It was inspected at the air field and subsequently flown to higher headquarters.

The rancher's name and location of his place was withheld.

MAN FINDS SHINY STEEL DISC; TO CLAIM REWARDS

CHICAGO, July 8 (P)—Flying saucers "were a dime a dozen today, but a resident of Oakwin, Ia., claimed to have found one in his front yard worth \$1,000.

Lloyd Brown, "wholesale tobacco salesman, displayed a shiny, steel disc about 6 1/2 inches in diameter and 1/2 of an inch thick. He said it was a flying disc.

Mr. Brown said he heard something "come crashing through the trees last night." When he awoke this morning, he said he found the saucer.

"I intend to notify army authorities and I'll file a claim for the rewards being offered," he said.

Rewards totaling \$1,000 have been posted for "capture" of a flying disc. Three separate groups or persons each have put up \$1,000.

THESE BIKINI ISLAND SCIENTISTS are being shown a relief map of the area by Dr. L. S. Donaldson. All are members of the Bikini scientific recovery expedition, due to depart today aboard the USS Chitina (APA-58). Left to right, they are: Dr. J. H. Roberman, Dr. Dana Russell, Dr. L. P. Schultz, Dr. Donaldson, Dean D. M. Whicker, J. E. Tracey, E. H. Shaler, and Capt. R. G. Gilliam, USNR. (Story on Page 5.)—U. S. navy photo.

Foreign Policy May Shift From 'One World' Principle

By R. H. SHACKFORD

WASHINGTON, July 8 (P)—Russia's rejection of the Marshall plan gave dramatic support today to a new foreign policy official view, which the wartime grand alliance was an illusion and that the late President Roosevelt's design for "one world" is dead.

Some are proposing that the U. S. admit this publicly as it has been recognized privately in these quarters for months. They would openly seek a "working arrangement" for the two worlds, hoping it would provide a 50-50 chance for peace.

Most of these officials, who are secretaries of state George C. Marshall's advisers, have believed that the American dream of one world with a cooperative Russia is practical or feasible.

They claim that:

1—There are at least "two" worlds—led by the U. S. and the USSR—which are irreconcilable and a desirable factor since it is seldom attainable.

Lewis Wins Pay Increase For Miners; \$13.05 a Day

(From UP and AP Dispatches)

WASHINGTON, July 8 (P)—John L. Lewis today formally signed a new wage contract with southern and midwestern coal operators, ending 250,000 of the nation's 400,000 bituminous miners back to work after a brief strike.

The pay—best ever won by Lewis—covers immediately about 75 per cent of the soft coal industry.

The new contract provides a \$13.05 daily wage rate for an eight-hour day with one-half hour sleep time. It also provides for a 10 per cent increase for the union health and welfare fund.

They said coal production costs will go up 47 cents to \$1.25 a ton. Some industry sources believe a steel price rise is certain and that this would force up prices of consumer goods, raise from steel.

Lewis said the best would be "interesting" because it is the first negotiated since passage of what he described as the "Taft-Hartley law, a reference to the Taft-Hartley bill putting new restrictions on unions.

Mr. Feinsinger SHOWN ON ARRIVAL

More B-29s Will Be Sent Overseas

WASHINGTON, July 8 (P)—The United States is stepping up the frequency of its B-29 training missions over the Pacific to the point where Superfortresses will be on hand in Europe and the Orient most of the time.

As the new B-50 bombers begin to reach operating units of the 8th Air Force, the B-29s will be sent overseas in greater numbers.
