PARAPHRASE NOT REQUIRED. HANDLE AS CONFIDENTIAL CORRESPONDENT
PER PAPAS 51 (i) and 60 (a) AR 380-5

From: CG PACUSA Tokyo, Japan

To: War Department for CCAAF

Hr: A 97331 GB

19 August 1946

Considered vital to our operations and situation in the Pacific is latest and best information and evaluation of the Swedish robot weapon incidents which have been continuing over the past several months. Answers to the following specific questions are especially desired:

- A. Are they rockets or jets, for example V-2 or V-1 type?
- B. What bases are being used?
- C. What radius of action is being attained?
- D. Is their accuracy known and if so, what is it and how was it attained?
- E. What are technical details of the weapon or weapons being used including sizes and composition of war head?

END.

ACTION: AAF
