EXPERIENCE

Diaspora Policy Institute, berlin — Freelance Web Developer

JAN 2021 - PRESENT

An ongoing web design project for a berlin based client

- Gathered business and user requirements from client, Researched and designed an interactive prototype
- coding up websites using html, css and javaScript.

Ipade, Berlin — UX/UI Designer

OCT 2020 - FEB 2021

A mobile app that helps musicians connect and collaborate. A project I implemented as part of an immersive UX Design program with careerfoundry. from ideation to completion.

- Researched and conducted user interviews for both qualitative and quantitative overview
- Designed personas, user flows, wireframes & interactive prototypes
- Tested product with potential users and design peers. Reiterated designs based on user feedback.

Parexel, Berlin — Software Validation Engineer

DEC 2014 - DEC 2017

Worked on various internal and external projects to deliver validated clinical trial systems

- Designed automation test frameworks, suits, as well as scripts and led IT system validation activities for core clinical logistic applications.
- Developed, reviewed, and approved test grids, traceability matrix
- Executed manual and automated scripts across systems
