

Leadership For Sustainable Development In Turbulent Times

What Is Turbulence In An Organization?

The easiest way to define turbulence is ‘unpredictable uncertainty for strategic planning purposes’.

LOCOMeX’s [Corporate Sustainability Software](#) provides community outreach and engagement features.

What Is Sustainable Leadership?

Sustainable leadership provides direction, alignment, and commitment to address social, environmental, and economic problems to improve the world.

LOCOMeX's [AI-Powered ESG and Sustainability Management Software](#) offer relevant insights to help you achieve your ESG objectives.

How Do You Lead In Turbulent Times?

1. Example from supply chain sustainability enables managers to make the connection between how their decisions about the global supply chain can either intensify or lessen the turbulence.
2. Exposure to sustainability knowledge measures in management education can boost global awareness and empathy in current and future managers.
3. It is also discovered that threshold learning can cause a significant improvement in self-reflection and does not require direct facilitation by an instructor.

The [Corporate Sustainability Software](#) from LOCOMeX is continually working to provide meaningful and useful sustainable solutions for the development of your firm.

What Are The Best Characteristic Of A Leader That Can Help You To Face A Different Kind Of Turbulent Times?

1. Presence
2. Relating
3. Sensemaking
4. Action
5. Service
