

## Full Collection of Oncolytic Virus Products

To better assist the oncolytic virotherapy research, especially in pre-clinical stage, scientists of Creative Biolabs has developed a library of oncolytic virus construct that can not only be used as reference agents, but also as starting construct of backbone for further engineering or modification to generate new oncolytic virus candidates with new functions or indications. Our product are mainly based on adenovirus, vaccinia virus, herpes simplex virus and vesicular stomatitis virus.
