

siRNA, Anti-Human A1BG

Cat. No.: SIRGT00001WQ

For Research Use Only. Do NOT use in humans or animals.

PRODUCT INFORMATION

Product Overview The product SIRGT00001WQ is a type of small interfering RNA (siRNA) that targets A1BG gene and regulates the expression of gene. The siRNA interferes with the expression of A1BG gene with complementary nucleotide sequences by degrading mRNA after transcription, preventing translation. It has potential applications in RNA interference (RNAi) and gene therapy development.

SPECIFICATIONS

Species	Human
Scale	20/50/100/200 nmole
Target	A1BG
Alternative Names	A1B; ABG; GAB; HYST2477
Related Diseases	Steroid-resistant nephrotic syndrome
Purification	HPLC

GENE INFORMATION

Full name Alpha-1-B glycoprotein

Target Introduction The protein encoded by this gene is a plasma glycoprotein of unknown function. The protein shows sequence similarity to the variable regions of some immunoglobulin supergene family member proteins.
