

Why Data scraping is important for business?

Xing is a business networking website for professionals Which supports almost 16 languages. It allows users to connect with each other related to their profession. Xing helps people in getting updates about the jobs and organizations with the number of employees. This is the reason people upload their correct information in profiles like phone numbers, addresses, and emails.

Extracting data from any website you will need some sort of web scraping tool. A web scraper basically accesses the website automatically trying to mimic a real person accessing it and then collect the data based on given keywords. Some websites implement blocks so as to prevent data collection off of their websites, thus web scrapers have to implement features which let them look like a genuine person accessing the web. These features are usually implemented on more premium web scrapers.

Is there a Xing Scraper that scrapes hundreds of profiles data from Xing?

Yes, there is a tool by using which we can scrape data from the Xing site easily or can use that data for our organization too. Scraping data from Xing can give you the data of the user which is public on the Xing user profile only. Xing Scraper can scrape this data for you; it can scrape data like email addresses, phone numbers, and other information that are public on the Xing profile; it cannot scrape data that is kept private by the users.
