

Today, when consumers are ready to buy a specific product, nearly 74% of them go straight to Amazon to do it. By the end of this year, Amazon is expected to account for more than 52% of the e-commerce market in the US. In 2018, the retailer accounted for 48% of the market. This information must sound threatening to other retailers in the country.

Build Scrapers For Olx and Amazon Site Using Anysite Scraper

The diagram illustrates the workflow of the Anysite Scraper. A central blue robot icon represents the scraper. It is surrounded by logos of various websites it can scrape, including fyp, BBB ACCREDITED BUSINESS, CYLEX, Hotfrog, canada411.ca, ebay, KOMPASS INTERNATIONAL, Sulekha, Walmart, OLX, Alibaba, amazon, and manta. The scraper outputs data to a database, XML, JSON, and TXT files. The text "Anysite Scraper" and the website "www.ahmadsoftware.com" are prominently displayed at the bottom. The logo for AHMAD SOFTWARE TECHNOLOGIES is also present.
