

Bed Bugs

Bed bugs are tiny, wingless, brownish red bugs. They are found in furniture, wall hangings, mattresses and loose wallpaper. Bedbugs are great hitch hikers. They travel in clothes, luggage, furniture from one place to another. It is a myth that Bed Bug Infestation only increases in dirty places or dirty laundry. They can also start infestation at clean places. So, it is better to check second hand furniture or any other items that are bought and that have any risk of Bed Bugs. Also remove any boxes under the bed as they can be a hiding place for Bedbugs. In United Kingdom (UK) Bed Bug Infestation has increased by 65% compared to the previous year.
